Abstract

Original Articles and Short communication:

a structured abstract with the headings **Background, Materials and Methods, Results** and **Conclusion** in no more than **250** words

Review articles:

a non-structured abstract in no more than **250** words

Case Report:

a structured abstract with the headings **Background, Case report** and **Conclusion** in no more than **250** words

Letters to the editor:

do not require an abstract

Keywords: Keyword 1; Keyword 2; Keyword 3; Keyword 4; Keyword 5

3 to 5 Keywords according to **Mesh terms**

Separated each keywords by **semicolon**

“Letter to Editor” do not required keywords

Introduction

Chronic neck pain is one of the most common musculoskeletal disorders, presenting in 60% of patients for a period longer than 5years [1].

Please put reference citations in **square brackets []**

Materials and Methods

Tables must be cited in the manuscript text and be numbered consecutively using **Arabic numerals.**

Results

The mean age in Group A was 51.7 ± 9.1 years and in Group B was 49.3 ± 9.2 . In the group A, 52.3% and in the group B, 45.2% (n = 19) were men. Baseline characteristics are shown in **Table-1**. Mean NDI score before the surgery was 46.9 ± 6.1 in the group A, and 41.3 ± 4.7 in the group B. The mean NDI score improved significantly in the group B (**Figure-1**).

Figures must be cited in the manuscript text and be numbered consecutively using **Arabic numerals**

Discussion

Conclusion

Acknowledgments

Please disclose any financial relationship with any commercial entity that has an interest in the subject matter or materials discussed in the manuscript.
